### **DETAILED ACTION**

1. Applicant is advised that the Notice of Allowance mailed is vacated. If the issue fee has already been paid, applicant may request a refund or request that the fee be credited to a deposit account. However, applicant may wait until the application is either found allowable or held abandoned. If allowed, upon receipt of a new Notice of Allowance, applicant may request that the previously submitted issue fee be applied. If abandoned, applicant may request refund or credit to a specified Deposit Account.
2. The indicated allowability of claims 1 and 3-5 is withdrawn in view of the newly discovered reference(s) to Izutani (U.S. Patent No. 5,483,262). Rejections based on the newly cited reference(s) follow.

### ***Drawings***

3. The drawings are objected to under 37 CFR 1.83(a) because they fail to show "protruding member 35" (specification, page 4, lines 23-28) as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes

Art Unit: 2671

made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 3-5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Izutani (U.S. Patent No. 5,483,262).

As per independent claim 1, Izutani teaches an electronic device comprising a controller (col.2, lines 57-58), an interactive display screen coupled to the controller (col.2, lines 60-61; col.3, lines 32-33), a housing having an engagement member (Fig.2, 2) for releasably engaging a stylus pen to allow mounting of a stylus pen to the housing (col.3, lines 1-12), an actuator (Fig.3, 3) associated with the engagement member, wherein, in use, the actuator provides an activation signal indicative of the stylus pen engaging or disengaging the engagement member, and in response to the activation signal indicating the stylus pen disengaging the member, the controller provides a signal

Art Unit: 2671

to activate the display screen (col.3, lines 13-22; col.3, lines 29-33, i.e., in on state, display unit 6 is also activated).

As per dependent claim 3, Izutani further teaches wherein when the activation signal is indicative of the stylus engaging the engagement member, the electronic device powers down (col.3, lines 15-17).

As per dependent claim 4, Izutani further teaches wherein the actuator is a biased switch (col.3, lines 33-37).

As per dependent claim 5, Izutani further teaches wherein the biased switch has a protruding member that protrudes into a stylus receiving chamber of the engagement member (Figs.2A-2C and Figs.3A-3D; col.3, lines 5-22).
